

NAVISTOOLS MODEL PUBLISHER/BROWSER

Navistools Model Publisher/Browser is a solution for browsing Navisworks models in the web. It enables Navisworks models to be browsed and managed anywhere with all kind of devices that have a modern Web Browser installed. In addition of browsing 3D models user can also browse and edit database information that is attached to the model items.

Solution includes Model Publisher which is used to export Navisworks models to WebGL3D graphics in to the Web Server. After that the models can be browsed and related database information can be edited with all modern Web Browsers without need to install any 3rd party plugins.

Total solution for handling models and related databases will also include Navistools Standard that is used as an interface for server or cloud based database. By default, the solution is running on our Web Service which we are offering as a service, though it is also possible for the clients to purchase and install it into their own Web Server.

Here's a link to our test model:
